

*Small, simple, and impactful. Bud vases add colour, movement, and charm to any space.*

## QUICK GUIDE

### TIME

approx. 5 minutes per vase

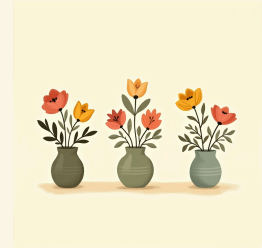

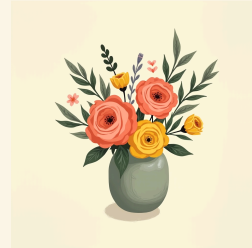

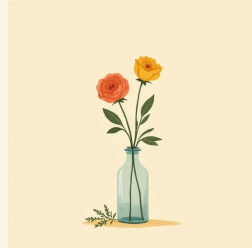

### GROUP SIZE

1+

### STEMS

2-5 per vase

## INSPIRATION

## MATERIALS

Shears

Bud vases

Finish Spray

Flower food

Ribbon & embellishments

included

optional

## ARRANGE STEMS

1

Fill each bud vase halfway with clean room temperature water. Add a pinch of flower food and stir.

### TIP

When making many bud vases, add water and two packets of flower food to a large bucket, stir, and dunk each vase until filled.

2

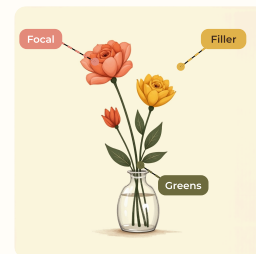

Start with 1-2 leafy stems. Cut stems at a 45° angle to preferred height and place in the vase.

Keep the arrangement no taller than twice the height of the vase. For guest tables, keep low enough for conversation — add a few taller stems if desired for movement and dimension.

3

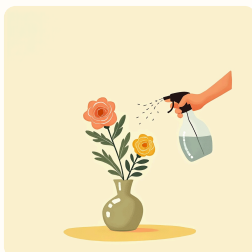

Add 2-3 focal and filler flowers, leaving breathing room between stems to play with negative space. Large blooms need shorter stems for stability — tall, heavy blooms can tip the vase.

## FINAL TOUCHES

1

Lightly mist flowers with **Finish Spray** to hydrate and preserve them.

2

Store in a cool place away from direct sunlight until they are ready for transport.

3

Top up with water as needed. Remove or replace any wilted blooms before the event.
