

A delicate wearable floral piece perfect for special guests.

QUICK GUIDE

TIME

approx. 20 minutes per corsage

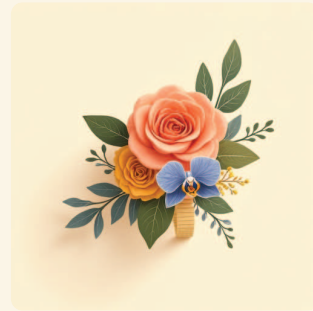

GROUP SIZE

1 per corsage

STEMS

3–5 per corsage

INSPIRATION

MATERIALS

Shears

Corsage wristlet

Paper-based floral tape

Double-sided glue strips

Crowning Glory spray

Sealed container

Safety pins

Ribbon & embellishments

included

optional

PLAN YOUR CORSAGE

Corsages come in all shapes and sizes. You can add ribbon or other embellishments as desired. Typical sizes include:

- **Minimal** — 1 small focal flower with 3–5 filler or leafy accent stems
- **Classic** — 1–2 focal flowers with 5–7 filler or leafy accent stems
- **Full** — 2–3 focal flowers with 5–7 filler or leafy accents

MINIMAL

CLASSIC

FULL

The **corsage wristlet** has a plastic card which will be the foundation your design elements stick on. Think in layers when building a corsage:

- Start with a base of leaves or ribbon to cover the plastic card.
- Add 2–3 small flower bundles to create shape, fullness, and balance.
- Finish with 1–3 focal flowers as the main feature of the design.

Plan the look you want to achieve by testing how different leaves, focal, and filler flowers look when placed together. Let stems fall naturally rather than forcing their direction.

★ TIP

Avoid creating more than 3–4 layers — this can make the corsage heavy and uncomfortable to wear. Avoid placing sharp or irritating textures near the wrist edges.

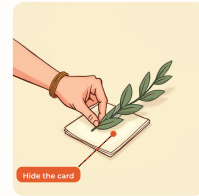

CREATE THE BASE LAYER

Apply a **double-sided glue strip** to the plastic card on the corsage wristlet. Press firmly and remove the top film.

Add 2–5 leaves to cover the plastic card and create a foundation for your design.

OPTIONAL

Add ribbon loops or other decorative accents — secure them with another glue strip pressed on top of the leaves.

CREATE ACCENT BUNDLES

1

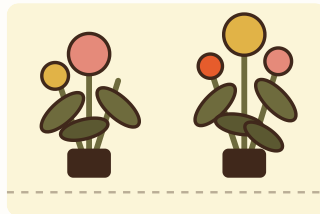

Select 2–3 small stems using a combination of **leafy stems** and **filler flowers**. Trim stems to approximately 1 inch long.

Hold the stems together and wrap with **paper-based floral tape**, gently stretching as you wrap from top to bottom to activate the adhesive. Tear the tape and smooth the end.

2

Make 1–2 additional bundles that complement the first. Bundles do not need to be identical, but they should feel balanced when placed together.

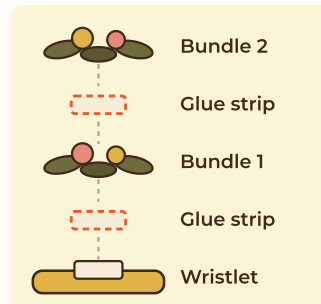

3

Apply another **double-sided glue strip** on top of the base layer. Arrange the bundles on the wristlet, leaving space in the centre for the focal flowers.

TIP

Before attaching bundles with glue strips, try the wristlet on to visualize how the flowers will sit on the wrist.

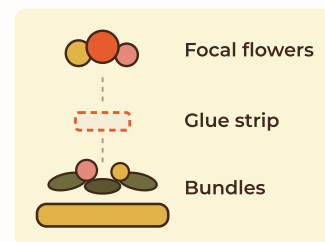

ADD FOCAL FLOWERS

Apply a final piece of **double-sided glue strip** to the centre of the corsage. Trim the adhesive before placing if needed.

Place 1–3 focal flowers over the adhesive to complete the design and conceal the glue strip.

OPTIONAL

Cut small pieces of glue strip to add additional accents, such as ribbon, dried elements, or decorative details.

FINAL TOUCHES

1

Line a sealed container with a damp paper towel. Place the corsage in the container.

2

Lightly spray with Crowning Glory to help preserve the flowers. Close the container and place in the fridge until the event.

TIP

Place extra safety pins in the container for backup support, in case a bundle needs re-securing.

3

On the event day, place the corsage on the wrist like a bracelet.
